

Single-pipe entry for the installation of drinking water pipes and cables

WalliN HOUSE ENTRY

Civil engineering

Water

Energy

HVAC

Building construction

TYPE SELECTION

WalliN **House Entry**

Fields of application

For setting in concrete for the subsequent installation of pipes and cables

Material

PVC-U plasticizer-free polyvinyl chloride with special coating

Properties

PVC-U pipe with screw connection for pressure-tight insertion of supply lines and cables, up to 2 bar. The special coating ensures an optimum connection to the concrete;

There is also the option of creating a rubber reduction with individual cable assignment.

Sizes

DN 32; DN 40;

Others on request.
