PSI PIPE SUPPORT SADDLES

ADAPTED TO CASING SPACER SYSTEM DSI

FOR SUPPORTING HEAVY PIPES

FOR CARRIER PIPES UP TO ND 1400

WWW.PSI-PRODUCTS.COM
PSI Pipe Support Saddles

GENERAL INFORMATION

To support very heavy carrier pipes

Extremely long carrier pipes can be supported with these polyurethane mixture components. PSI pipe support saddles are adapted to PSI casing spacers and reliably prevent contact between the carrier pipe and the casing - even when there is an extreme load of soil on the pipe. For push-ins, a double ring of casing spacers can be mounted as an equivalent replacement at the beginning and end of the crossing.

Material

Polyurethane compound to prevent damage to the pipe insulation.

Compressive strength: approx. 1000 N/cm²

Special version with rubber pad

Material and dimensions as described above, however with glued on rubber pad. Thickness of pad upon request.

Price and delivery time upon request.

Information and delivery time upon request

For available sizes, see price list

Subject to technical changes.
